

S ~ A R T P R O D U C T I N D E X

NOTE: All figures highlighted in grey refer to cable lengths available ie AV2105 = 0.5 metre, AV2110 = 1.0 metre etc.

AV2105, 10, 20, 30, 50 (Scart to Scart - Fully wired)

- For all high quality A/V interconnections requiring a fully wired Scart to Scart cable. This cable is non-directional.

AV4110, 30, 50 (Scart to Scart RGB - RGB video only)

- For the very best quality A/V systems using RGB video connection only. All unused connections are removed to maximise picture quality. Full data connection provided. No audio transmission. This cable is directional.

AV1020, 50 (1 RCA to Scart (in) - 1 RCA Phono Plug to Scart cable; video only)

- For use where a RCA phono composite video signal needs to be connected to a Scart-equipped TV Monitor. No audio transmission. This cable is directional

AV1120, 50 (Scart to S-Video - Scart to S-Video cable; video only)

- For use where a Scart (S-Video) signal needs to be connected to the input of a S-Video socket-equipped TV Monitor. No audio transmission. This cable is directional.

AV1220, 50 (S-Video to Scart(in) - S-Video to Scart cable; video only)

- For use where an S-Video signal needs to be connected to a Scart-equipped TV Monitor, typically in an A/V system using a separate surround sound amplifier. No audio transmission. This cable is directional.

AV1320, 50 (Scart to 2 x RCA Phono - audio only)

- For use where stereo audio signals need to be connected to a hi-fi amplifier from a Scart socket-equipped source component. This cable is directional.

AV1420, 50 (Scart to 3 x RCA Phono - Stereo Audio + Composite Video)

- For use where Scart equipped A/V source needs to be connected to an RCA phono equipped VCR or TV Monitor. This cable is directional.

AV1520, 50 (3 x RCA Phono to Scart(in) - Stereo Audio + Composite Video)

- For use where RCA phono composite video and stereo audio signals need to be connected to a Scart-equipped TV monitor or VCR. This cable is directional.

AV1620, 50 (Scart to 2 x RCA Phono + 1 S-Video - Stereo Audio + S-Video)

- For use where Scart equipped A/V source needs to be connected to an A/V amplifier, S-VHS video recorder or S-Video TV. This cable is directional.

AV1720, 50 (2 x RCA Phono + 1 S-Video to Scart(in) - Stereo Audio + S-Video)

- For use where an S-Video and stereo audio A/V source need to be connected to a Scart-equipped TV or S-VHS video recorder (record only). This cable is directional.

AV1820, 50 (Scart to 6 x RCA Phono - Stereo Audio In/Out + Composite Video In/Out)

- For use where record and playback are required of stereo audio and video, typically between an A/V amplifier and VCR. May also be used with DVD players/recorders. This cable is bi-directional.

AV1920, 50 (Scart to 6 x RCA Phonos - Component RGB + Stereo Audio Out + Sync)

- For use where RGB + sync component video and stereo signals need to be transmitted from a Scart-equipped A/V source to an RCA phono-equipped high-end TV or video projector. This cable is directional.

Unique SQART™ plug

Heavy duty cast alloy plug casing with durable and attractive zinc plating is designed to fit edge-to-edge in horizontally aligned scart sockets. 24ct gold plated surround & pin sections Unique specially formed surround for secure precision fit. All unused connections are removed to maximize picture quality.
